JVC'S LATEST DOCKING STATIONS FOR ONE OR TWO iPod AND iPhone
NX-PN10 / RA-P50 / RA-P51
Portable Systems for iPod and iPhone

The leading provider of home audio equipment, JVC is introducing three new models in the Portable Systems for iPod line-up — the Double Dock NX-PX10, and the single dock RA-P50 and RA-P51. Listen to songs easily by mounting an iPod on the direct dock, and also have the iPod charged at the same time. All models are compatible with iPhone, and feature an FM tuner with preset stations.

NX-PN10

The NX-PN10 is the second Double Dock system for iPod from JVC that plays and charges two iPod side by side. The latest model is compatible with iPhone 3G in addition to iPod. You can even enjoy iPod video files on your TV by connecting via the units composite video output terminal.

Experience a new style of operation with the Motion Sensor; just wave your hand near the set to turn the power on. Sleek, sophisticated design features an illuminated acrylic back board. The unit is compact enough to fit on a bedside table or for using in the living room to listen to songs from a friend's iPod.

White RA-P50 / Black RA-P51

The white RA-P50 and black RA-P51 models are compact portable audio systems for iPod. Besides using an AC adapter, the units also work on batteries to enjoy your favourite music wherever and whenever you want. Other features include the buzzer or iPod-auto-play dual alarm with snooze function. The units are also compatible with iPhone 3G.

iPod and iPhone are trademarks of Apple Inc.
