

Slim Smart Sophisticated Smooth

# HD Everio

Technologies perfected to optimise your precious memories

## World's Smallest and Slimmest Design

It took JVC to make an HD camcorder so small and light. 30% smaller compared to the previous year's, these models are the world's smallest and thinnest HD camcorders with built-in HDD\*, making them easier to carry and enjoy than ever before.

\* As of January 2009.

## 1920x1080/50P Output

### **1080/50P** Output

Using the same technology as DynaPix HD displays, this function outputs a 1080 scanning line image at progressive 50fps so you can enjoy uncompromising picture quality on a TV that accepts 1080P input.

Conventional interlace

1080/50P Output

Jaggies are smoothed out.

## HDMI™ (V.1.3 with x.v.Colour™)

### **x.v.Colour**

The xvYCC colour standard, known as x.v.Colour™, provides more accurate colour reproduction with more detail and shades.

Among the colours that the human eye can perceive, x.v.Colour™ can display 100% compared to about 55% with sRGB.

x.v.Colour and its logo are trademarks.

## 20x Optical Zoom

Developed for Everio by the camera specialists at KONICA MINOLTA, this new HD lens features advanced optics to deliver a high zoom ratio that's tops in its class for HD camcorders.
