

Everio

Everio MediaBrowser

Everio's bundled PC software is easier to enjoy than ever before.

The intuitively interactive user interface provides everything from file playback, management, simple editing, as well as Everio's "share and carry" functions, within a single application. You'll be able to do more with your videos, from day one.

Easy File Management

Everio MediaBrowser has a calendar type graphical interface that displays thumbnail images of your recorded videos and stills, superimposed on the date they were taken. So it's clear to see exactly when you took which scene. You can easily switch between "Daily" and "Show all" displays. And with built-in filter functions, you can instantly narrow down your selection to just videos, just stills, and so on.

Show all

Show all with file information

Easy Playback

Data files residing on your Everio can be played back on your PC. Just double-click on the scene you want to view, and playback starts. Full-screen viewing is also possible.

Full-screen playback

Easy "Share and Carry" Operation

Exporting to iTunes®, uploading to YouTube™, and burning to DVD disc... all of these "share and carry" operations are simplified to the extreme. Just press the exclusive function button, select the file you want to use, and follow a few simple steps shown on the computer screen. You're done before you know it.

Simple Editing

Simple cut edits are possible while viewing the playback image. Just push the Movie Edit button and select "from here to there" using the scroll bars to easily cut out unnecessary scenes.

Upload to YouTube™
