

Everio

Designed to make it a pleasure to use

Convenient 2-Way Strap

You can use it as either a grip belt or a wrist strap, whichever suits the occasion. When not in use, it fits snugly the body to minimise storage space.

Auto Power ON/OFF & Auto Lens Cover

With Everio, you don't have to use the power switch each time you operate because the power is linked to the LCD's opening and closing. Just open the LCD; the power turns on and the lens cover automatically opens. Just close the LCD to power off and close the lens cover too.

Power ON

Power OFF

Quick Restart

In combination with Auto Power ON, you're ready to shoot in about 1 second when the LCD is re-opened. Never miss a crucial moment.
